- **Moore Stephens Belgium** - CPM Consultant and Product Owner (subcontracted element61) Planning Analytics Solution for the budget and planning.
- **Nationale Bank Belgie** – Project manager (subcontracted element61) – Project manager for a Tagetik finance project transforming their current budget workflow to a Tagetik solution.
- **Several small installations of Planning Analytics**

*Deloitte – Information Management  
May 2014 – Dec 2016*

### **Senior Information Management Consultant**

Primarily working at several projects in Belgium focusing on the IBM Cognos BI platform. Mid 2015 repositioned my focus to IBM Cognos TM1 to become a more complete performance management consultant. Customers include:

- **Local Police of Antwerp** – Application Management/Reporting Specialist/ Internal BI Consultant
- **Digipolis** – All round BI Specialist, supporting BI projects where needed
- **Deloitte Tax** – Automate data conversion to the FEC standard
- **Tenneco** – Implementing a workforce planning tool and go to person for BI, improving the forecast process hugely
- **Umicore** – Implementing an actuals reporting model in TM1 with the ability to expand to a budget/forecasting model for the CSM controller department. Improving the controlling process as such

Next to my project work, I am actively involved in companywide activities, such as organizing service line fun events, an active contributor to the IBM & TM1 offering, coaching the new joiners and facilitating knowledge sharing sessions within our practice.

*The Cronos Group - Datamotive - Agiliz NV  
February 2011 – April 2014*

### **Business Intelligence Consultant**

Primarily working at several projects in Belgium as a Business Intelligence Consultant using mainly the MicroStrategy platform.

During my work at Datamotive-Agiliz I had the privilege to work in various sectors across Belgium & Germany:

- **Retail** – A.S. Adventure
- **Fast Moving Consumer Goods** – Delhaize Group Belgium
- **Airpower** – Atlas Copco
- **Energy management** – Elster Energy ICT
- **Pharmaceuticals** – UCB – IM Associates
- **Fleet** – J&J Fleet Department
- **Automotive** – Honda Europe NV

My task during these projects differed from business analysis to developing. From performance management to data warehouse architecture. Also leading teams of 3 – 5 persons was part of the task list.

## Duties

- Developing advanced reports and dashboards
- Developing and managing KPIs to drive improvements and deliver performance
- Business analyst
- Motivating and leading teams
- Coordinating work for and providing directions to team members
- Coaching juniors and guiding new joiners
- Growing on my clients

## Key Competencies

- Experience in several tools such as MicroStrategy, IBM Cognos BI, IBM TM1, Pentaho, Power BI, Azure Data factory and Microsoft Business Analytics stack.
- Experience in implementing data warehouse models, Business Analytics solutions and planning solutions
- Able to coordinate small teams (3-5 persons)
- Able to manage projects with consultants <= 300 man days
- Ability to be effective in a fast paced and constantly changing IT environment
- Analytical and business minded
- Business process improver
- Fast learner and quickly adapt to new situations
- Trilingual Dutch, English and French.
